Street Light

Outdoor Area Light

The street lights are ideal for lighting large areas. They are typically found on walkways, ramps, roadways and bike paths. Their high luminous efficiency provides high visibility while using significantly less energy. These fixtures can be mounted onto a pole, junction box or trunnion mount (sold separately). The photo cell sensor option (sold separately) can save money and energy by automatically turning off the light when daylight is detected.

- Die-cast Aluminum with Clear Lens
- Bronze Finish
- 70 CRI
- ETL Listed - Wet Location
